Q1 - How often do you play games? (0 – 3 hours per week, 3 – 6, 6 – 12, 12+)
0 - 3

Q2 - What platforms do you spending playing most of the time? (PC, console, mobile, other)
PC, Mobile, Switch

Q3 - What type/genre of games do you enjoy playing? (Indie, Action, Casual, Adventure, Simulation, RPG, Strategy, Action-Adventure, Sports, Racing)
RPG, Open World, RTS

*Plays scripted game**
*Plays LLM powered game** LLM powered game played first.
** The order in which the games are played should be randomised.*

Questions after scripted game.

Q4 - Did you like the dialogue system intuitive? (strongly disagree, disagree, agree, strongly agree)
A

Q5 – Were you engaged when interacting with the dialogue system? (strongly disagree, disagree, agree, strongly agree)
A

Q6 – Did the NPCs dialogue stay consistent and in character within the given story and not reference outside of the game scope? (strongly disagree, disagree, agree, strongly agree)
A

Q7 - Did you find the dialogue natural? (strongly disagree, disagree, agree, strongly agree)
A

Q8 - When talking, did it feel like you were actually talking to this fictional character? (strongly disagree, disagree, agree, strongly agree)
D

Q9 - How confident are you with your answer? (not at all, somewhat, very)
V (3)

Questions after LLM-powered game.

Q10 - Did you like the dialogue system intuitive? (strongly disagree, disagree, agree, strongly agree)
A

Q11 – Were you engaged when interacting with the dialogue system? (strongly disagree, disagree, agree, strongly agree)
D

Q12 – Did the NPCs dialogue stay consistent and in character within the given story and not reference outside of the game scope? (strongly disagree, disagree, agree, strongly agree)
D

Q13 - Did you find the dialogue natural? (strongly disagree, disagree, agree, strongly agree)
SD

Q14 - When talking, did it feel like you were actually talking to this fictional character? (strongly disagree, disagree, agree, strongly agree)
D

Q15 - How confident are you with your answer? (not at all, somewhat, very)
S (3)

Questions after finishing both games.

Q16 - Do you think the LLM powered dialogue was more useful than the scripted dialogue when trying to figure out the murder case? (strongly disagree, disagree, agree, strongly agree + why)
I disagree with the sentiment that the LLM powered dialogue was more useful than scripted as it felt quite vague and non-sequitir at times, having the prompt it each time felt irksome. The scripted version felt more frank and straightforward, we compare to standard and express delivery. LLM felt like i had to wait much longer at each step for my package to arrive.

Q17 - Would you buy a game with LLM powered NPCs as a core part of the conversations? (yes, no, maybe + why)
Maybe, so long as it is internally consistent in its narrative and is able to maintain context-window appropriately. so it would come down to game type and narrative, + the modes of engagement (whether it is multimodal etc..). LLM output is often easily identifiable due to its lack of heterogeneity and similar styles or forms of writing, and so it may feel repetitive or boring in its static variety at times.

Q18 – Do you prefer one version over the other? Why?
I prefer the scripted version, quicker, more seamless experience. doesn't require being spoonfed at each turn, and the delay in responses. felt more convergent and natural whereas LLM at times felt like it was leading me away from the conclusion than closer (divergent).

Q19 – What felt confusing, unnatural, or frustrating when talking to the NPCs for both versions?
LLM version specifically felt very constricted at times, like prompting multiple times often related similar responses, so whilst you may be allowed a greater degree of freedom in expressing your queries, its responses do not seem to exhibit that same level of license, though this may be necessary to maintain structure of the narrative.

Q20 - Anything else you want to add?
N/A
